

Hello guys I present you the new Social Network revolution.Tsu opened at 10.10.2014 and it grows up so fast and in a few months it will be popular like Facebook or Twitter.

This Social Network is something new that nobody haven't seen!! It pays its users to post , share , like.Its just like Facebook or Twitter but you got paid while you are posting your stuff !!!!!!! How much you have earned from Facebook or Twitter ? 0.00\$? This new Social Network will change this!

I will show you my ultimate guide how to gain 150-200 quality followers everyday for 5-10 minutes of work.

Ok lets get started

First you should join TSU

[*Sign up here*](#)

After you complete your registration it may ask you to confirm your email but I think that's not neccessary.

Like every social media you should make up your profile look good. You know put a picture , cover picture , write a good bio etc.

After you complete these steps you are ready to get started.

Ok that's how I gain 150-250 new quality followers every single day.

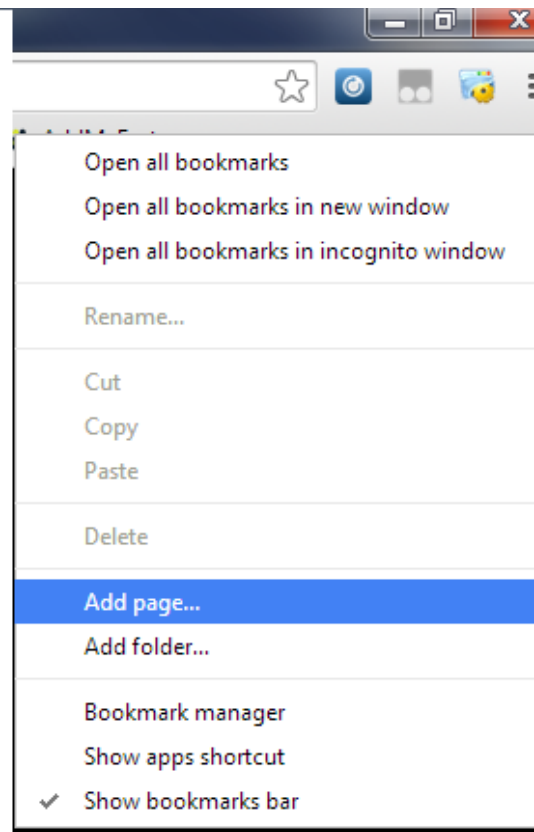

I will explain you how to use this script for Google Chrome and Mozilla Firefox.

If you are using Google Chrome browser you should do the following steps.

Open your Google Chrome browser.

Look at the picture bellow and do exactly what you see and read on it.

Move your mouse over the bookmark toolbar and click the right button. Then click ADD PAGE.

Then a new window will open up.

Read the description in the picture.

Edit Bookmark

Name:

URL:

▶ ☒ Bookmarks bar
☐ Other bookmarks

As you can see i have named the page tsu bot to reconize it easier :D just joking.
On the name field type whatever you want and in the url field copy and paste the text below this picture.

Copy this code

**javascript: \$(document).ready(function(){
\$('.follow_button').click();});**

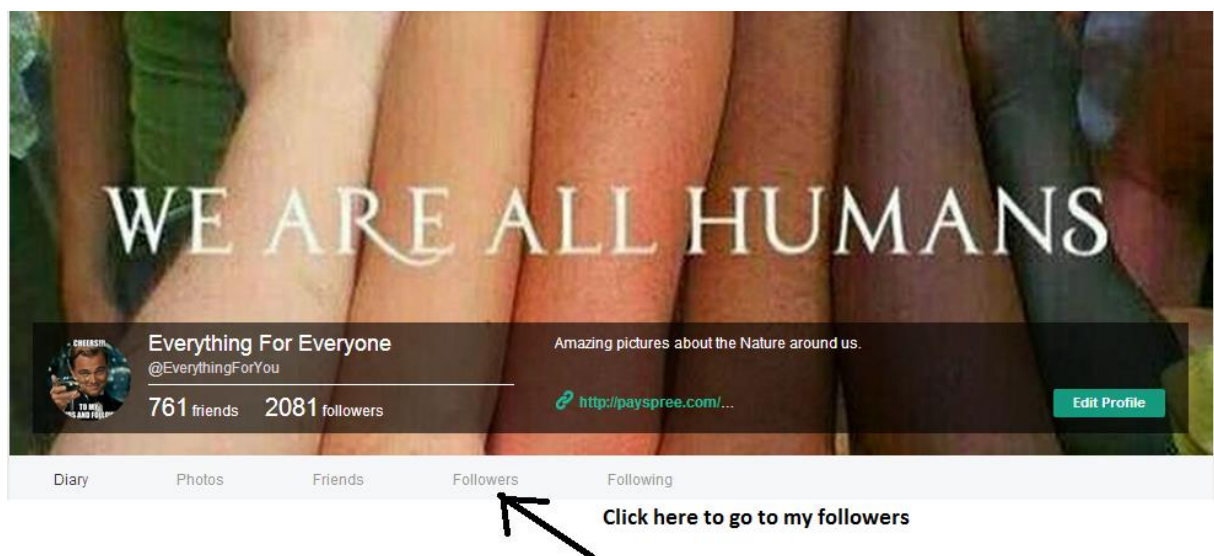

**and paste it in the Url field then simply click Save and
you are done with the script for now.It will show up in
your bookmark toolbar with the name you have
typed.**

**After your script is ready for use you must go to
somebodys profile with a lot of followers.Lets take my
profile for example ☺**

**Everytime you are doing this you must use different
profiles so you would be able to follow new and new
people every time.**

Go to my profile

<https://www.tsu.co/EverythingForYou>

**Then simply scrool scrool and scrool down the page
10-12 times to show up like 150-200 of my followers.**

**Then click on the script you have created and wait 20-
30 seconds until it follows all people on that page.**

You are done for now you have automatically followed 200 people in 20-30 seconds. Even if 50% of them follow you back you will gain 100 new followers within a few hours.

Meanwhile you should make your profile interesting and post your stuff (videos , pictures , quotes , jokes) so new people will follow you and stay your followers.

You can do this with different profiles 2-3 times a day follow 500-600 new people everyday until you think you got enough followers.

But there is a problem !

There has a limit of 1000 people to follow only (I hope they will make this up soon)

Don't worry I will help you with this problem too. When you hit the limit of 1000 people followed and you cant follow anymore just go to your profile click **Following**.

Then do the same things as you do before. Start scrooling down and down and down 10-12 times until 150-200 profiles show up. Then just press the script on

**your bookmark toolbar and wait 20-30 seconds until
unfollow them all.**

Its simple right?

**Unfollow 300-400 profiles and you are ready again to
follow new people and gaining new followers.**
